

PASCAL RACINE-VENNE

Senior Engineering Manager

Laval, QC (Montréal area) | pascalracinevenne@gmail.com | linkedin.com/in/pascal-racine-venne | French & English

SUMMARY

Engineering manager with a developer's background and nearly four years leading product engineering teams in sustainability and ESG SaaS. I work closely with Product, keep delivery realistic, and help distributed teams stay aligned. Twenty years as a drummer taught me how good teams work: listen first, keep time, serve the song.

EXPERIENCE

Nasdaq Metrio · Sustainability & ESG reporting software Montréal, QC (Hybrid) | Jan 2023 – Present

Senior Software Engineering Manager Apr 2025 – Present

- Lead a 9-person product engineering team (Python backend, React/TypeScript frontend) building Nasdaq Metrio's in-house CMS for sustainability and ESG reporting.
- Coordinate across multiple microservices and teams in Montréal and Bangalore.
- Set up shared planning rituals and clear ownership to keep dependencies and releases aligned across time zones.
- Own the full delivery cycle with Product: backlog preparation, planning and scoping, client transitions, risk management, and communication with internal and external stakeholders.
- Introduced AI-enabled development workflows, using AI coding agents and custom agent skills to automate repetitive engineering work.
- Took part in joint Product and Engineering sessions to evaluate Shape Up and design a return to Scrum, keeping what had worked well for developers.
- Coach team members and deal with conflict early and directly.

Software Engineering Manager Jan 2024 – Mar 2025

- Moved from integration to lead a new product engineering team building the CMS; established delivery and communication practices with Product and stakeholders.
- Part of the Product and Engineering group that adopted Shape Up after a change in Product leadership; helped onboard developers through presentations and recommended reading.
- Helped hire three frontend developers, assessing technical capability, collaboration, and product thinking.

Manager & Individual Contributor, Integration Jan 2023 – Jan 2024

- Managed a 3-person integration team delivering public sustainability reports for clients, built with HTML, CSS, React, and Figma-based designs.
- Planned client work with project and account managers, turned requirements into backlog items, and protected team focus through clear scope and realistic commitments.
- Stayed hands-on with design mockups, frontend implementation, technical guidance, and quality review.

Le Wagon · Teacher & Workshop Trainer (Freelance) Montréal, QC | Oct 2021 – Jan 2023

- Taught full-stack web development (Ruby on Rails, JavaScript, PostgreSQL) in both the French and English programs; coached students through debugging, code review, and code style.
- Led introductory web development workshops in Indigenous francophone communities.

Professional Drummer & Music Teacher · Freelance Montréal, QC | 2000 – 2023

- 22 years performing in bands and teaching drums and music production: designed multi-level course content, tracked student progress, and personalized instruction to each learner's goals.

EDUCATION

Web Development Bootcamp · Le Wagon, Montréal 2021

Bachelor of Music, Performance · Université du Québec à Montréal (UQAM) 2018 – 2021
